Perfect for multi shift users who are constantly plugging and unplugging earpieces, causing accessory port issues. This solution is reverse wired so the earpieces are plugged into the adaptor instead of directly into the radio, eliminating unwanted service problems for the dealer.

- Adaptor stays connected to the radio and accessories are connected and disconnected to the adaptor.
- Avoid costly repairs and radio down time associated with accessory port issues.
- Customized connections promote customer return. Only LS3 earpiece accessories work with the adaptor and cannot be substituted with other vendor earpieces.
