

SL+2W

SnapLock™ Earpiece Base with Braided Fiber Cable

This SnapLock™ System is a versatile 2-wire solution connecting a microphone and PTT directly to a variety of earpieces. The cable and PTT remain attached to the radio while the earpiece is swapped out during shift changes, ensuring hygiene and convenience. The braided fiber cloth cable offers 90 lbs. of pull strength, providing enhanced durability, comfort, and a tangle-free experience while also featuring RF-shielding for improved audio clarity. With compatibility across multiple radio models, it's a highly adaptable tool for professional communication.

*Shown with M1 connector

Features

- 90 lbs. pull strength with braided fiber cloth construction for enhanced durability, comfort, and a tangle-free experience
